The last striking feature of the convention was the adoption of the ratio exclusing federal office-holders from the national committee office-holders from the national committee. It was an anexpected concession to the civil as we an anexpected concentration of new civil service reformers. The nomination of Resell. Clayton had rendered the did na igns com-mittee unpopular, and a rule was proposed by Delegate familiers of Montans, requiring that the members of that committee sacuid have the qualifications of presidential electors—that is, qualifications of pridential electure—that in-they must not be sens fore or representatives, or, hold any, office of trust or profit under the United States. This is simply the acceptance of the cive service sat on the subject. Deputy Collector Youngblood, of Alabama, resigned his office rather than to dropped from the com-mitter, which shows that these places even in the shouth are highly valued, and probably render an appreciable quid pro que, which is sufficient cased for the adoption of the rule. . which is a

Limplore you to look at these things impar-tially and you will not lot this coally lesson of indolence, and gross incapact y be lost to the coming. Bo you think me unkind in the day country. Bo you think mo, unkind in the day, of calardie? They are all my friends, think, so far as they are capable of being francis to anyons who sarms his bread by toll. But if you had seen as I have during the past year or two their pretonsions and fach and insolence; their alliance, with the Vanderbitte and all met as contribute to the carrying forward of an bloory, you would say with me most heartly that their fall was fortunate indeed, fortunate for the country, fortunate most especially for the Grants. Let not this ten million lesson be last.

And this in brief is the story of a man whose

From Dean Church's Life of Suoma.
We shall never again see an Aristotle or a
Bacon, because the conditions of anowledge
have altered. Hecun, like Aristotle belonged have altered. Hecem, title Arisone unlonged to an age of adventure, which went to sea little k; owing whither it went and ill-dirifished with knowledge and instruments. He miteride with a vast and vague schume a discovery on these unknown seas an new veride which it was tre familiar and delity traversed it every a tre familiar and delity traversed it every the season of the sea direction. This new worldish snow edge has turned out in many wave very different from what Aristotic or Bicon supposed, and les been whith Aristotte or Braces supposed, which he been conquered by implements and weapons very different in presison at a power from what they purposed to rely on. But the combination of patient and careful indistry, with the sourage and devination of genius, in doing what mose had done before, makes it equally simple and idle to impeach their greatness.
